**Estimated
visitors from
data eco-
counters**

2015

3.350.000

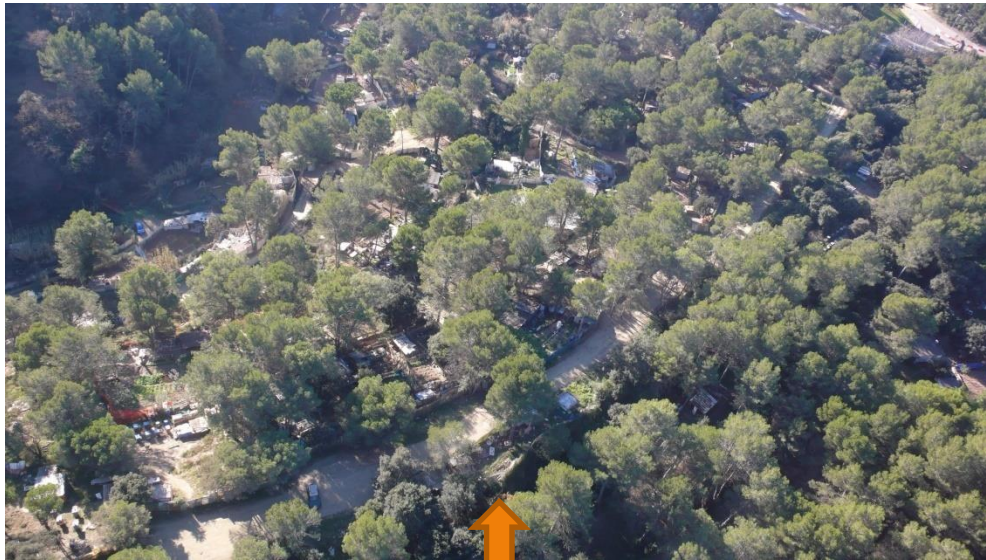

—

3.500.000

Regulation of authorized activities

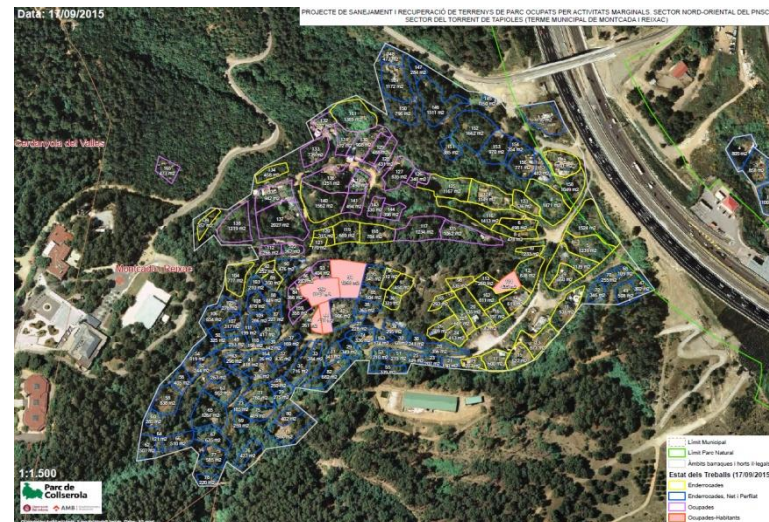

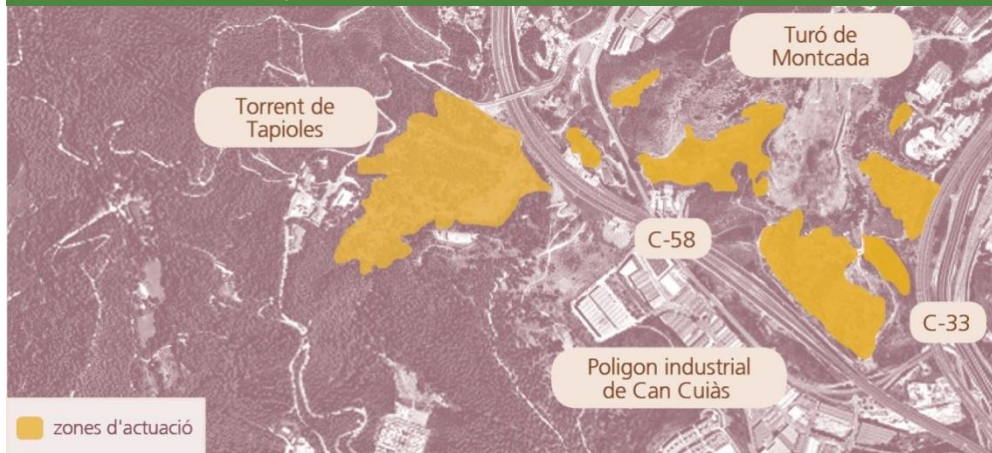

Surveillance and control of activities.

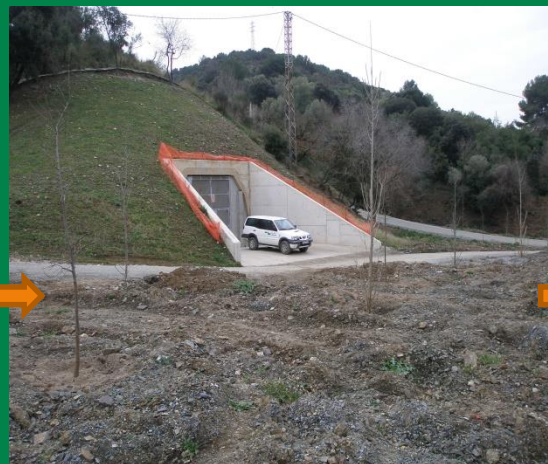

394 annual incidences (2015)

Demolitions (illegal occupations)

Areas of activity for 2015

C Guardianship, counseling, partnerships with governments, universities, owners, companies ...

D Planning reports and collaborations in the field of urban planning

Futur challenges

- **Plan and restore the fringe of the park that is in contact with the urban area**
- **Balance between conservation and public use of the park**
- **Achieve greater involvement of municipalities in the management and financing of the park and in the implementation of the planning discipline**
- **Approve the new “Special Management and Protection Plan” in order to respond to current and future problems**

Fire prevention

Detection

Field of fire monitoring device

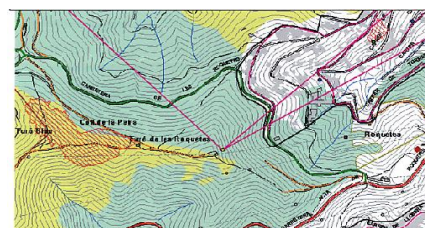

Implementation and maintenance of preventive measures

Maintenance of fire prevention strips

Maintenance of water points

Repair and maintenance of roads and forest tracks

Agricultural and Forest management

Farming Plan

Strengthen farmland, preventing abandon fields and promoting the recovery of abandoned fields

Livestock development (sheps and goats). Strengthening grassland control.

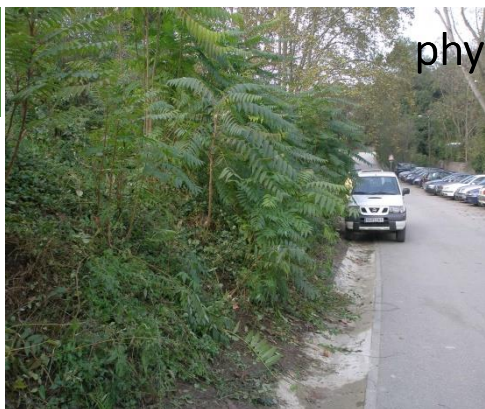

Recovery of agricultural built heritage

Monitoring and
control of
invasive alien
species

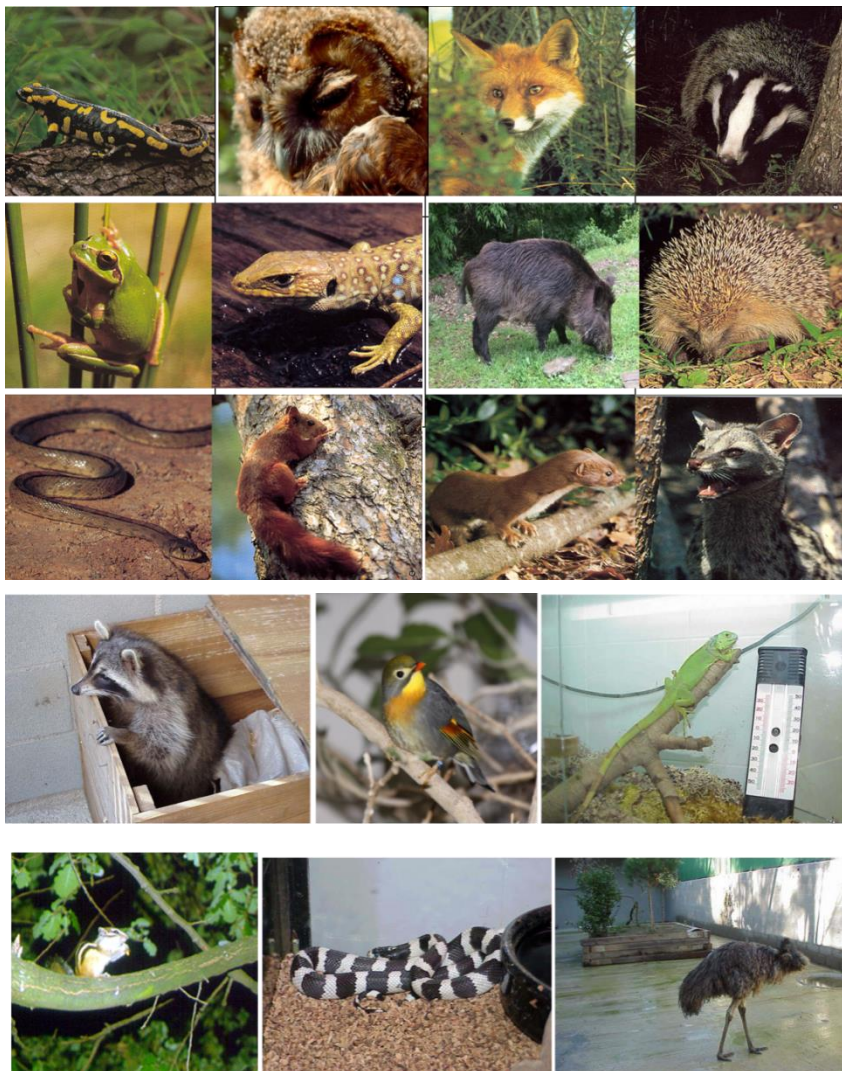

Phytosanitary
treatments

phytosanitary treatments

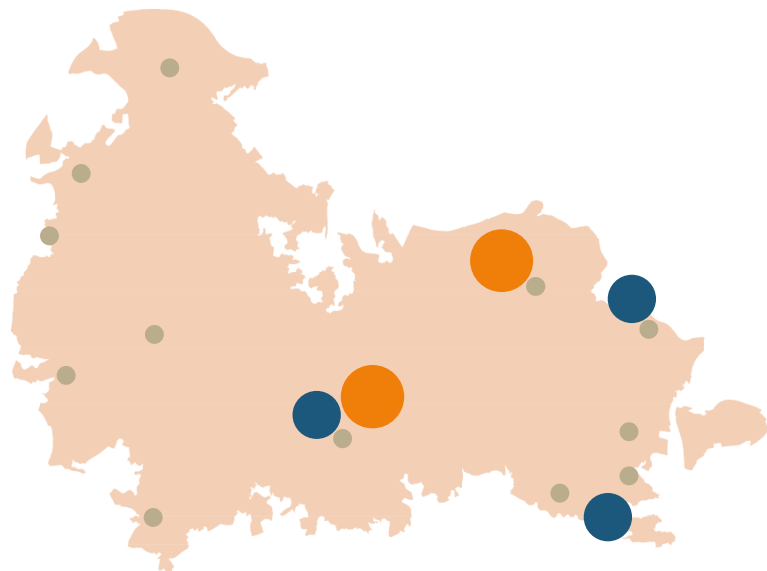

Studies and research (Biological Station)

Recovery of habitats. Maintenance of infrastructure, recreation areas and signposts. Garbage collection. Monitoring activities

Facilities for public use

Facilities

Information points

Recreational areas

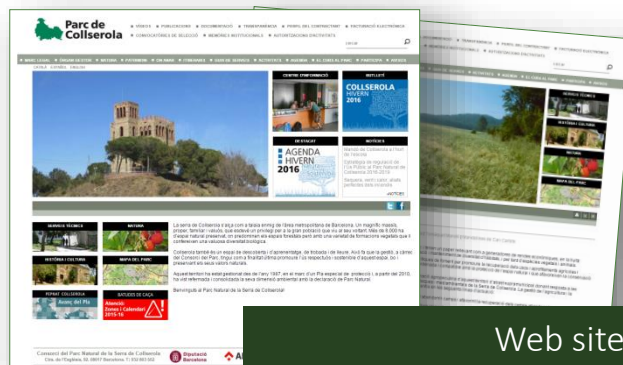

Communication

With a motto "**Collserola cares you. Take care Collserola**"... To show the **ecological and health benefits** that represents **live near a natural area**.
